

## Electroplated wheel advantages for manufacturing the "Chip Braker" Flutes on an End Mill

Constant and accurate profile all throughout the grinding process.  
The Same profile is achieved on the flute throughout the grinding process.  
No need to make compensation in Software for wheel wear.  
No need for dressing.

Customer can supply a DXF file with the required profile on the End-Mill. Strauss Will supply a drawing of the actual wheel for approval.

Once Wheel Profile is confirmed – Strauss will manufacture the Blanks and will Plate the wheel accordingly.

Stringent in Process control & Final control will ensure wheel Profile.

Wheels will be supplied with a Test coupon for Profile Checks.
